

Hello, I'm Ibrahim Abdulla

UI/UX Designer with 4 years of experience in crafting and shipping superlative products that impact people .

01. — ABOUT ME

I've been working in the industry since 2016 and had the chance to gain experience in both design and development. Over the last years I have worked with both small and large clients like Fujifilm.

I learned that I prefer working on corporate to enterprise projects with more creative freedom, so I joined a web design and development company in Dubai, where we are passionately working hard to push the web to it's limits.

Due to my passion for digital design and current trends I applied as a young jury member and am honored to join the Awwwards family and have the chance to vote for the best websites around the world.

I have been always trying to improve myself, grow as a designer, create awesome experiences and solutions.

02. — PROCESS

01 Discovery

Gain knowledge of users, context, technologies, gather user data, research competitive products, conduct interviews and field studies.

02 Explore.

Build user profiles on gathered data, produce materials that will aid the outlining of the project, site maps, content inventories, screen flows, navigation models, task flows, user journeys, scenarios.

03 Select.

Evaluate, test, and select wireframe concepts for prototype development.

04 Develop.

Create design specifications and evolve concept/ wireframes into full design solution.

05 Refine.

Evaluate design with stakeholders to obtain feedback and conduct usability testing.

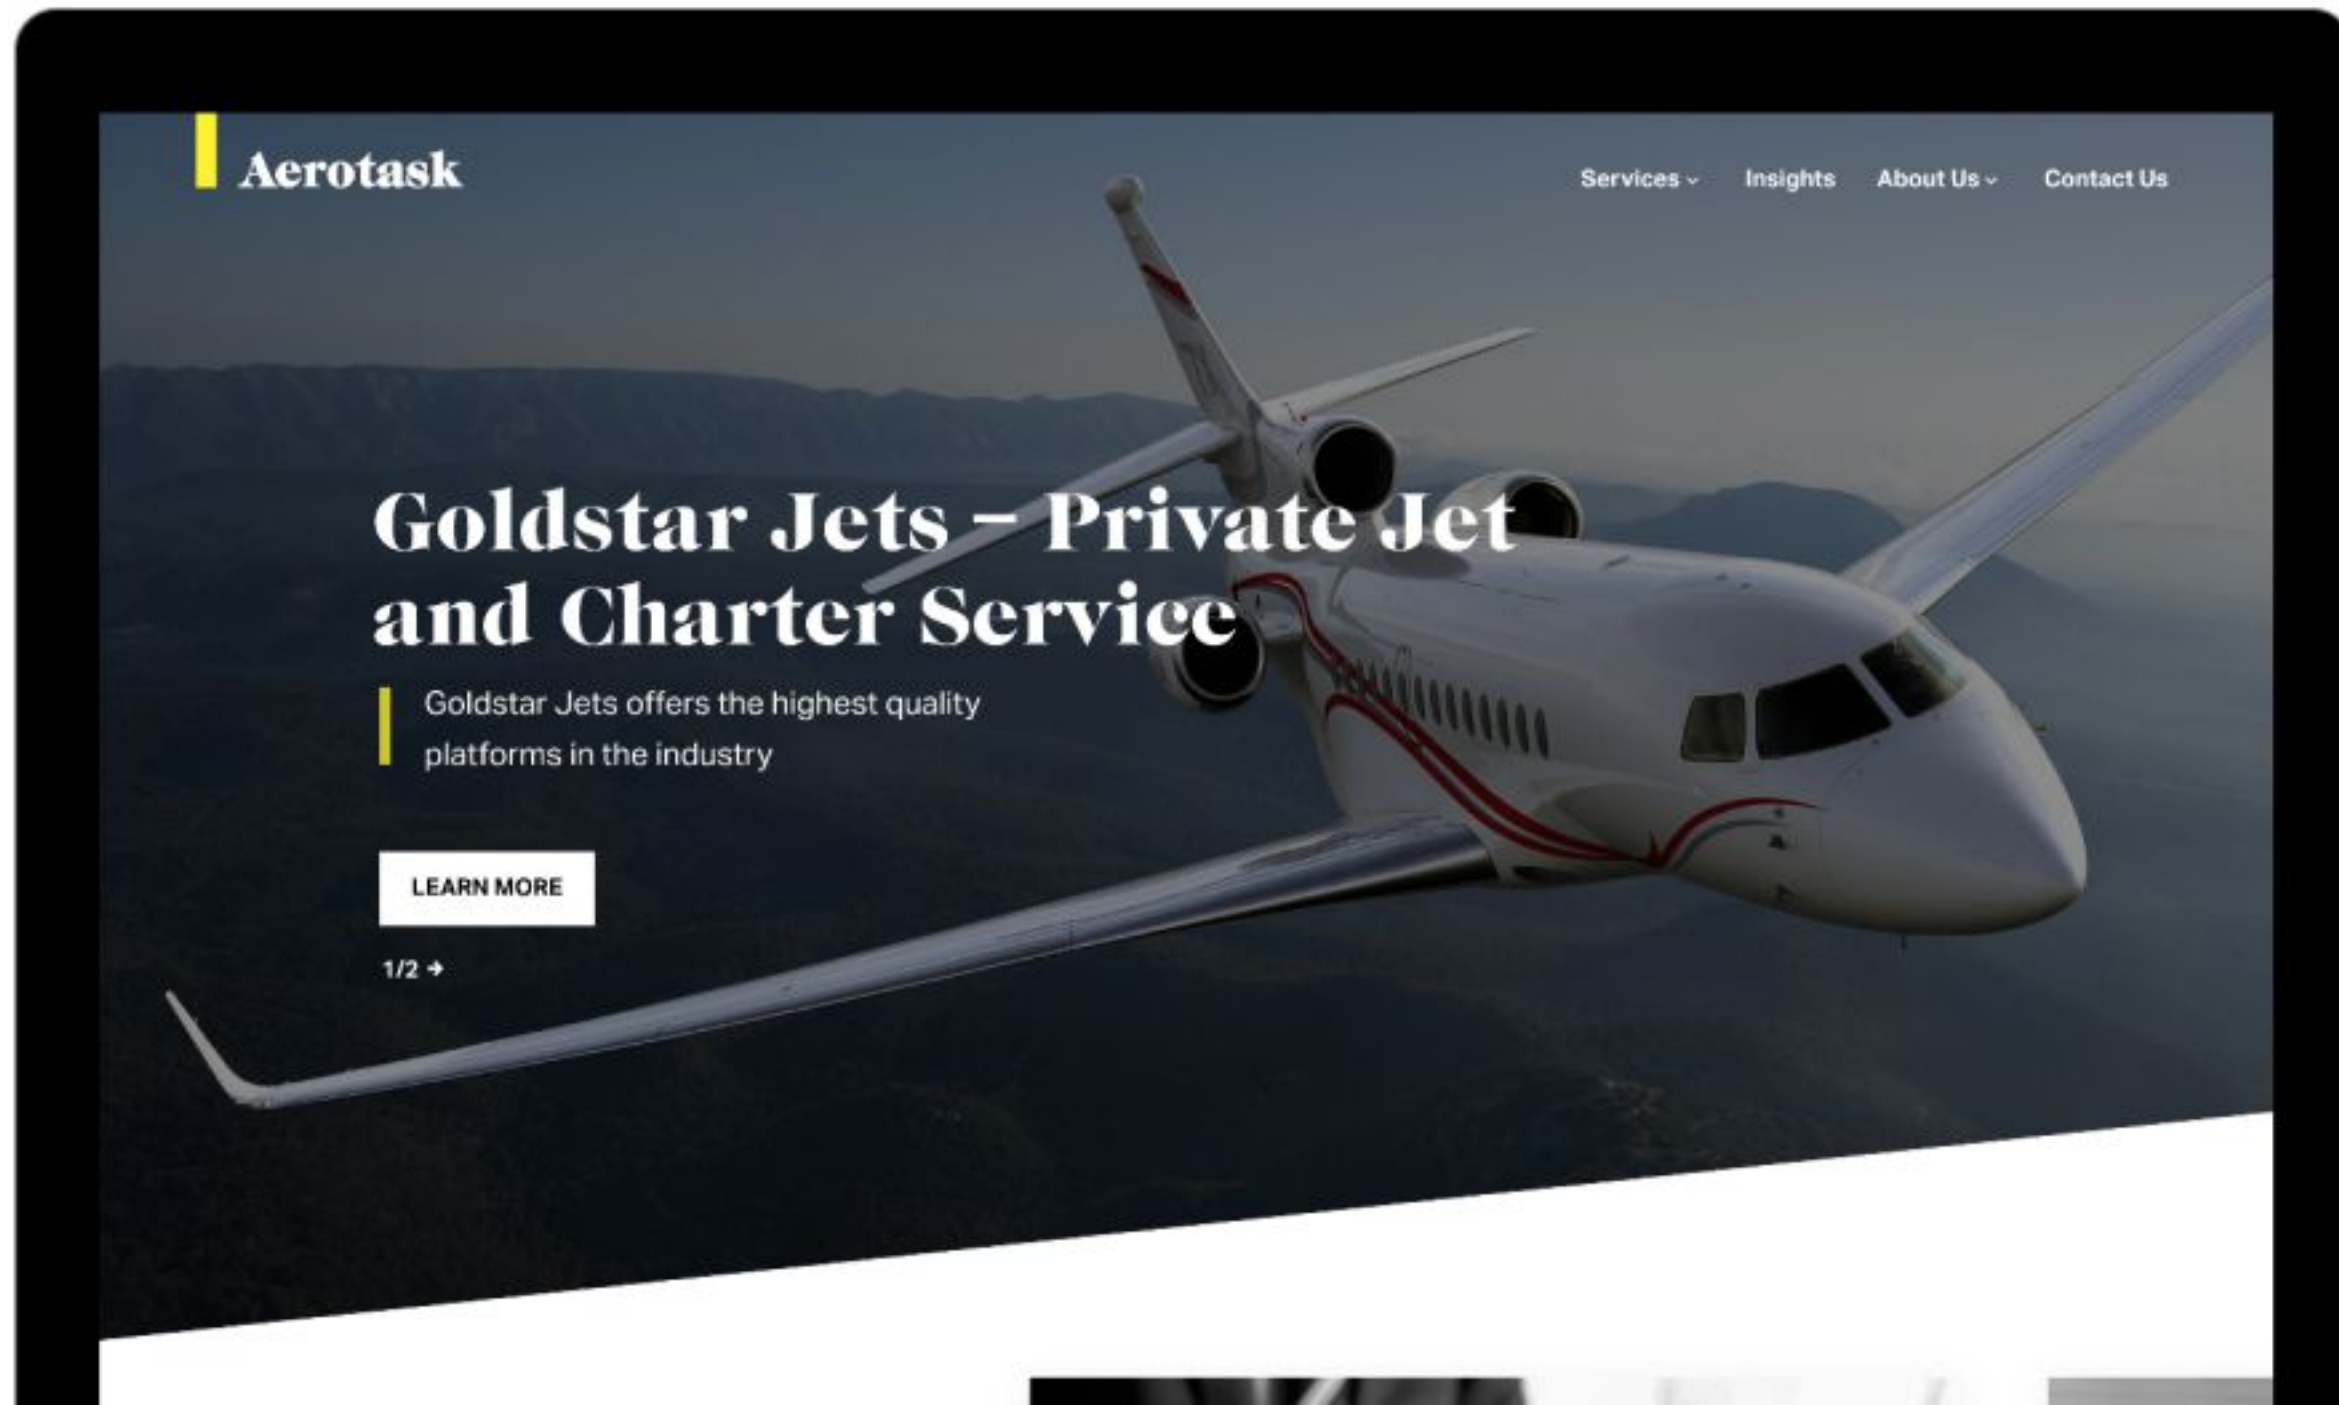

06 Deliver.

Complete design and produce deliverables.

07 Test & Maintain.

Once the initial project is completed we test and maintain for additional improvements

ENQUIRE

Massage Care Soft but Firm

It saves about 27% of space! As the massage progresses,
it goes into Zero Gravity - while tilting backwards, the chair automatically
slides forward from the wall which enables a 27% space saving.
